CONTENTS

ORIGINAL SCIENTIFIC PAPERS

Aleksandra Comino, Alojz Ihan, Radovan Komel and Carlo V. Bruschi		
The Conditional Mutation <i>cdc6-1</i> Affects Chromosome Segregation in <i>Saccharomyces cerevisiae</i> (1)		1
Maja Matulić and Branko Brdar		
Induction of Urokinase-type Plasminogen Activator by Sodium Salicylate in a Glioblastoma Cell Strains. (1)		5
Srećko Jelenić, Jasna Berljak, Dražena Papeš and Sibila Jelaska		
Mixoploidy and Chimeric Structures in Somaclones of Potato (<i>Solanum tuberosum</i> L.) cv. Bintje . . (1)		13
Gellért Bujdosó, Christoph M. Egli and Thomas Henick-Kling		
Inter- and Intra-Specific Differentiation of Natural Wine Strains of <i>Hanseniaspora (Kloeckera)</i> by Physiological and Molecular Methods (1)		19
Ana Begonja and Dubravka Hršak		
Effect of Growth Conditions on the Expression of Soluble Methane Monooxygenase. (1)		29
Mykhailo V. Gonchar, Mykola M. Maidan, Halyna M. Pavlishko and Andrii Sibirny		
A New Oxidase-Peroxidase Kit for Ethanol Assays in Alcoholic Beverages (1)		37
Ljubica Tratnik, Rajka Božanić, Goran Mioković and Drago Šubarić		
Optimisation of Manufacture and Quality of Cottage Cheese (1)		43
Petar Pujić, Sonja Durajlija-Žinić, Suada Pandža, Andreja Mikoč, Miroslav Plohl and Vera Gamulin		
Ribosomal RNA Operons in <i>Streptomyces rimosus</i> : Sequence of the <i>rrnF</i> and Comparative Analysis of <i>rrn</i> Promoter Regions (2)		77
Gellért Bujdosó, Christoph M. Egli and Thomas Henick-Kling		
Characterization of <i>Hanseniaspora (Kloeckera)</i> Strains Isolated in Finger Lakes Wineries Using Physiological and Molecular Techniques. (2)		83
Mira Kordiš-Krapež, Veronika Abram, Milica Kač and Stanka Ferjančič		
Determination of Organic Acids in White Wines by RP-HPLC (2)		93
Andrej Plestenjak, Marjan Simčič, Janez Hribar, Marjan Veber, Andrej Škorja, Mira Kordiš-Krapež, Peter Pavlič and Rajko Vidrih		
Sensorial Properties of Ice Tea as Affected by Packaging (2)		101
Rajka Božanić and Ljubica Tratnik		
Quality of Cow's and Goat's Fermented Bifido Milk during Storage (2)		109
Javier Solorza-Feria		
Study of the Changes in Cheese Making Parameters of Skim Milk with Divalent Cations Addition. (2)		115
Manuel Vázquez		
Effect of the Light on Carotenoid Profiles of <i>Xanthophyllomyces dendrorhous</i> Strains (formerly <i>Phaffia rhodozyma</i>) (2)		123
Roland Geyer, Theodor Kartnig, Herfried Griengl and Walter Steiner		
Influence of Flavonoids on the Stability of an (S)-Hydroxynitrile Lyase from <i>Hevea brasiliensis</i> . . . (3)		161
Ivan-Krešimir Svetec, Diana Stjepandić, Vlado Borić, Petar T. Mitrikeski and Zoran Zgaga		
The Influence of a Palindromic Insertion on Plasmid Integration in Yeast (3)		169
Branka Blagović, Jasminka Rupčić, Marko Mesarić, Katica Georgiú and Vladimir Marić		
Lipid Composition of Brewer's Yeast. (3)		175
Marijan Bošnjak and Stjepan Bogdan		
Introduction to the Theoretical Fundamentals for Increasing the Probability of Heterologous Contacts between Biological Particles. (3)		183
Margareta Glancer-Šoljan, Vice Šoljan, Tibela Landeka Dragičević and Ljiljana Čačić		
Aerobic Degradation of Formaldehyde in Wastewater from the Production of Melamine Resins . . (3)		197
Duška Čurić, Damir Karlović, Dubravka Tušak, Biserka Petrović and Jelena Đugum		
Gluten as a Standard of Wheat Flour Quality. (4)		353

Katarina Jernejc and Aleksa Cimerman

- Morphological Characteristics, Extracellular and Intracellular Protein and Enzyme Patterns of Five *Aspergillus* Species (4) 333

Maria Papagianni, Sue E. Nokes and Keith Filer

- Submerged and Solid-State Phytase Fermentation by *Aspergillus niger*: Effects of Agitation and Medium Viscosity on Phytase Production, Fungal Morphology and Inoculum Performance. . (4) 319

Christopher J. Bakal, Dušica Vujaklija and Julian Davies

- Immunochemical Identification of a Stat3 Analogue in Streptomyces (4) 313

Jožica Habijanič, Marin Berovič, Branka Wraber, Damjan Hodzar and Bojana Boh

- Immunostimulatory Effects of Fungal Polysaccharides from *Ganoderma lucidum* Submerged Biomass Cultivation (4) 327

PRELIMINARY COMMUNICATIONS**Goran Gregorović and Dušica Vujaklija**

- High Efficiency of Direct Plasmid Transfer between Two *Streptomyces* spp., and between *Streptomyces* spp. and *E. coli* (1) 49

Sunčica Papeša, Damir Ježek and Dijana Kujundžić

- Determination of Sorbitol Concentration in Diet Chocolate by High-Performance Liquid Chromatography (2) 129

Blagica Schwämmle, Eleonora Winkelhausen, Slobodanka Kuzmanova and Walter Steiner

- Isolation of Carvacrol Assimilating Microorganisms. (4) 341

VIEWPOINT**Sibel Roller**

- Genetically Modified Foods: Threat or Opportunity? (4) 259

REVIEWS**Jie Liu and Joseph Wang**

- A Novel Improved Design for the First-generation Glucose Biosensor (1) 55

Daslav Hranueli, Nataša Perić, Branko Borovička, Stjepan Bogdan, John Cullum, Peter G. Waterman and Iain S. Hunter

- Molecular Biology of Polyketide Biosynthesis (3) 203

Djuro Josić and Yow-Pin Lim

- Analytical and Preparative Methods for Purification of Antibodies (3) 215

Jagoda Šušković, Blaženka Kos, Jadranka Goreta and Srećko Matošić

- Role of Lactic Acid Bacteria and Bifidobacteria in Synbiotic Effect... (3) 227

Polona Žnidaršič and Aleksander Pavko

- The Morphology of Filamentous Fungi in Submerged Cultivations as a Bioprocess Parameter . . . (3) 237

Ivan Marković, Velimir Topolovec, Branka Marković-Devčić and Vladimir Marić

- Use of the Foster-Niemann Equation in Study of the Enzymic Processes (4) 347

Graciele Viccini, David A. Mitchell, Silvia D. Boit, Juliana C. Gern, Alexandre S. da Rosa, Roberta M. Costa, Farah D. H. Dalsenter, Oscar F. von Meien and Nadia Krieger

- Analysis of Growth Kinetic Profiles in Solid-State Fermentation (4) 271

Naim Kosaric

- Biosurfactants and Their Application for Soil Bioremediation (4) 295

Gerald M. Sapers

- Efficacy of Washing and Sanitizing Methods for Disinfection of Fresh Fruit and Vegetable Products (4) 305

Reingard Grabherr and Karl Bayer

- Vector Design Related to Bio-Processing. (4) 265

PROFESSIONAL PAPERS

Juris Vanags and Uldis Viesturs

Local Mixing Intensity Measurements for the Food Industry and Biotechnology (1) 59

Jasenka Sapunar-Postružnik, Davorin Bažulić, Mirela Grubelić, Helena Kubala Drinčić and Bela Njari

Cadmium in Animal Feed and in Foodstuffs of Animal Origin (1) 67

Manuel Beccera, Esther Rodríguez-Belmonte, Ma Esperanza Cerdán and Ma Isabel González Siso

Extraction of Intracellular Proteins from *Kluyveromyces lactis*. (2) 135

Mojmir Wondra and Marin Berovič

Analyses of Aroma Components of Chardonnay Wine Fermented by Different Yeast Strains (2) 141

Arnold L. Demain

The Relationship between Universities and Industry: The American University Perspective (3) 157

SUBJECT INDEX

A

- agitation
 - influence of, on phytase production by *Aspergillus niger*, 319
- alcohol oxidase
 - for ethanol assay, 37
- alcoholic beverages
 - ethanol assay in, 37
- amylase
 - Foster-Nieman equation in study of hydrolysis by, 347
- antibodies
 - monoclonal and polyclonal, 215
 - purification, 215
 - structure, 215
 - IgG, 215
 - IgM, 215
 - specific for Stat3 and Stat-like proteins, 313
- aroma components
 - of Chardonnay wine, 141
- ascorbic acid
 - in ice tea, 101
- Aspergillus* sp.
 - isolation of strains capable of assimilating carvacrol, 341
 - identification based on morphological characteristics, 333
 - identification based on biochemical parameters, 333
 - taxonomy, 333
- Aspergillus flavus*
 - morphological characteristics, 333
 - intracellular and extracellular proteins, 333
 - enzyme pattern, 333
- Aspergillus niger*
 - morphological characteristics, 333
 - inoculum for phytase production, 319
 - solid state fermentation, 319
 - submerged fermentation, 319
 - influence of agitation on phytase production, 319
 - influence of medium viscosity on phytase production, 319
 - intracellular and extracellular proteins, 333
 - enzyme pattern, 333
- Aspergillus oryzae*
 - morphological characteristics, 333
 - intracellular and extracellular proteins, 333
 - enzyme pattern, 333
- astaxanthin
 - production by *Xanthophyllomyces dendrorhous* strains, 123

B

- β -galactosidase
 - from *Kluyveromyces lactis*, 135
 - extraction by sonication, 135
 - purification, 135
- β -glucosidase
 - Foster-Nieman equation in study of hydrolysis by, 347
- Bacterium* sp.
 - isolation of strains capable of assimilating carvacrol, 341
- batch cultivation
 - of mixed microbial culture, 183
 - mathematical model, 183
- bifidobacteria
 - as probiotics, 227
 - in synbiotic effect, 227
 - physiological and taxonomical characteristics, 227
- Bifidobacterium bifidum* Bb-12
 - in cow's and goat's milk fermentation, 109
- biofilm
 - reducing by new washing and sanitizing methods, 305
- bioparticle contact probability
 - heterologous recombinations, 183
 - mathematical analysis, 183
 - kinetics, 183
 - computer simulation, 183
 - in batch and continuous culture, 183
- bioprocess design
 - effect on environmental conditions on fungal growth and morphology, 237
- bioreactor design and performance
 - scale up, 237
 - vector design related to, 265
- bioremediation
 - of soil by biosurfactants, 295
 - pilot plant and large scale, 295
 - of soil contaminated with hydrocarbons and heavy oil, 295
- biosensors
 - for glucose, 55
- biosurfactants
 - application in soil bioremediation, 295
 - promote biodegradation of hydrocarbons, 295
- Botrytis
 - isolation of strains capable of assimilating carvacrol, 341
- brewer's yeast
 - lipid composition of, 175
- brewing industry
 - by-product exploitation, 175

C

- cadmium
 - in animal feed and in foodstuffs of animal origin, 67
- callus culture
 - of *Solanum tuberosum* L. potato, 13
- candy (caramel) production process
 - control of mixing in, 59
- carotenogenesis
 - in *Xanthophyllomyces dendrorhous* strains, 123
 - astaxanthin production, 123
 - 3-hydroxy-3',4'-didehydro- β - ψ -caroten-4-one production, 123
- carvacrol
 - isolation of microorganisms capable of assimilating it, 341
- cdc6-1*
 - conditional mutation of, in *Saccharomyces cerevisiae*, 1
- cell cycle control
 - in *Saccharomyces cerevisiae*, 1
- cellulase
 - Foster-Nieman equation in study of hydrolysis by, 347
- Chardonnay wine
 - fermented by different yeast strains, 141
 - analysis of aroma components of, 141
 - sensory evaluation, 141
- cheese
 - Cottage cheese, 43
 - stretchable cheese of the Mozzarella type, 115
 - cheese making parameters, 115
- chimeras
 - in somaclones of *Solanum tuberosum* L. potato, 13
- chromatographic methods
 - for purification of antibodies, 215
- chromosome segregation
 - in *Saccharomyces cerevisiae*, 1
- computer simulation
 - effect of cultivation conditions on mixed microbial population, 183
- continuous cultivation
 - of mixed microbial culture, 183
 - mathematical model, 183
- corn
 - as genetically modified food, 259
- Cottage cheese
 - optimisation of manufacture and quality of, 43
 - composition of, 43
 - sensory evaluation, 43
- cow's milk
 - fermentation by bifidobacteria, 109
- cytokine assay
 - TNF- α , 327
 - IFN- γ , 327

D

- degradation of formaldehyde
 - by mixed culture of bacteria and yeast, 197
- diet chocolate
 - determination of sorbitol and other polyols in, 129
- dosage system
 - for high-viscous liquids, 59

E

- E. coli*
 - plasmid transfer to *Streptomyces rimosus* by electroduction, 49
- electrodeposition
 - between *Streptomyces* spp. and *E. coli*, 49
 - for plasmid transfer, 49
- electromagnetic drive
 - in bioreactor, 59
- electroporation
 - for direct plasmid transfer, 49
- enzymatic analysis
 - for alcohol assay, 37
- enzyme electrode
 - with metal-dispersed carbon paste, in glucose biosensor, 55
- enzyme kinetics
 - study by Foster-Nieman equation, 347
- ergosterol
 - extraction and quantification, from *Saccharomyces uvarum* cells, 175
- ethanol assay
 - new oxidase-peroxidase kit for, 37
- extraction
 - of β -galactosidase and lactase from *Kluyveromyces lactis*, 135

F

- fatty acids
 - extraction and quantification, from *Saccharomyces uvarum* cells, 175
- feed
 - contamination with cadmium, 67
- fermentation
 - of wine, 19, 83
 - of cow's and goat's milk by bifidobacteria, 109
- filamentous fungi
 - morphology in submerged cultivations as bioprocess parameter, 237
 - pellets, 237
 - mycelial morphology and metabolite production, 237
 - bioprocess design considering morphological characteristics, 237

flavonoids
 influence on the stability of hydroxynitrile lyase from *Hevea brasiliensis*, 161
 fluorescence activating cell sorting (FACS) analysis, 1

formaldehyde
 aerobic degradation by mixed culture of bacteria and yeast, 197

formic acid
 aerobic degradation by mixed culture of bacteria and yeast, 197

Foster-Nieman equation
 for analysis of enzymic processes, 347
 for elucidation of kinetic constants, 347
 for development of reaction mechanisms, 347

fungal morphology
 influence of, in production of phytase by *Aspergillus niger*, 319

fruit and vegetable products, 305

G

gadd45
 in glioblastoma cell strain, 5

Ganoderma lucidum
 immunostimulatory effect of its polysaccharides, 327
 submerged biomass cultivation, 327

gene expression
 heterologous, 265

gene technology
 influence on quality and quantity of world's food, 259

Geotrichum
 isolation of strains capable of assimilating carvacrol, 341

glioblastoma cell strain
 induction of plasminogen activator in, 5

glucose biosensor
 novel improved design for, 55

gluten index
 in wheat semolina and flour, 353
 optimal values for bread production, 353

GM food (genetically modified food)
 soybeans, corn, rice, tomatoes, 259

goat's milk
 fermentation by bifidobacteria, 109

growth kinetics
 in solid-state fermentation, 271
 empirical equations, 271

H

Hanseniaspora (Klockera)
 inter- and intra-specific differentiation of, 19, 83

heavy oil
 bioremediation of contaminated soil by biosurfactants, 295

in soil, 295

Hevea brasiliensis
 hydroxynitrile lyase from, 161

horizontal gene transfer
 by electroduction, 49

HPLC
 determination of organic acids from white wines by RP-HPLC, 93
 determination of carotenoids from *Xanthophyllomyces dendrorhous*, 123
 determination of sorbitol in diet chocolate, 129

hydrocarbons
 polycyclic aromatic hydrocarbons (PAH) in soil, 295
 bioremediation of contaminated soil by biosurfactants, 295

hydrogen peroxide
 application in new washing and sanitizing methods, 305

3-hydroxy-3',4'-didehydro- β - ψ -caroten-4-one
 production by *Xanthophyllomyces dendrorhous* strains, 123

5-hydroxymethyl-2-furfuraldehyde
 in ice tea, 101

hydroxynitrile lyase
 from *Hevea brasiliensis*, 161
 influence of flavonoids on its stability, 161

I

ice tea
 metals concentrations in, 101
 ascorbic acid in, 101
 sensory evaluation, 101
 storage, 101

identification
 of *Aspergillus* sp. based on morphological and biochemical analysis, 333

IFN- γ
 induction by polysaccharides from *Ganoderma lucidum*, 327

immunoglobulin
 IgG, 215
 IgM, 215
 structure, 215
 purification by precipitation and chromatographic methods, 215

intracellular proteins
 from *Kluyveromyces lactis*, 135
 extraction by sonication, 135
 β -galactosidase, 135
 lactase, 135

isozymes pattern
 differences on the subgenus level in *Aspergillus* species, 333

K

- kidney
 - level of cadmium in, 67
- kinetics
 - growth kinetics before and after heterologous contacts between biological particles, 183
 - substrate uptake kinetics, 183
 - product formation kinetics, 183
- Kluyveromyces lactis*
 - extraction of intracellular proteins from, 135
 - β -galactosidase activity, 135
 - extraction and purification of β -galactosidase and lactase from, 135

L

- lactase
 - from *Kluyveromyces lactis*, 135
 - extraction by sonication, 135
 - purification, 135
- lactic acid bacteria
 - as probiotics, 227
 - in synbiotic effect, 227
 - physiological and taxonomical characteristics, 227
- lipid composition
 - of *Saccharomyces uvarum* cells, 175
- liver
 - level of cadmium in, 67
- local turbulence
 - measurements by SIMD, 59

M

- mathematical analysis
 - of bioparticle contact probability, 183
 - of growth kinetics, 183, 271
- metal migration
 - from packaging material of ice tea, 101
- methanotroph, type II
 - expression of soluble methane monooxygenase in, 29
- methanotrophic-heterotrophic community
 - expression of soluble methane monooxygenase in, 29
- methylotrophic yeast
 - alcohol oxidase producer for analytical purposes, 37
- microbial contaminants
 - detachment and inactivation by new washing and sanitizing methods, 305
- Microsatellite-PCR
 - for wine yeast identification, 19, 83
- milk
 - skim milk, 115
 - cow's and goat's milk, 109

- mixed microbial culture
 - batch cultivation, 183
 - continuous cultivation, 183
 - surface cultures, 183
 - aerobic degradation of formaldehyde in wastewater, 197
- mixing
 - measurements of local mixing intensity for food industry and biotechnology, 59
- mixoploidy
 - in somaclones of *Solanum tuberosum* L. potato, 13
- molecular techniques
 - RAPD-PCR, 19, 83
 - RFLP, 19, 83
 - Microsatellite-PCR, 19, 83
- monitoring programme
 - for systematic residue control, 67
- morphology
 - of filamentous fungi as bioprocess parameter, 237
 - pellets and mycelial morphology, 237
 - use as identification key for *Aspergillus* sp., 333
 - effects of heterologous contacts between biological particles, 183
- multiple promoters
 - of rRNA operons in *Streptomyces rimosus*, 77

N

- NF- κ B inhibitors
 - in glioblastoma cell strain, 5
- nocodazole
 - synchronisation of *Saccharomyces cerevisiae*, 1

O

- oligosaccharides
 - non-digestible, 227
 - use as prebiotics, 227
 - role in synbiotic effect, 227
- organic acids
 - determination in white wines, 93
 - determination in Chardonnay, 141
- oxytetracycline
 - biosynthetic pathway engineering, 203

P

- palindrome
 - influence on plasmid integration in yeast, 169
- pathogene detachment and inactivation, 305
- pellets
 - of filamentous fungi as bioprocess parameter, 237

peroxidase
 for ethanol assay, 37

phospholipids
 extraction and quantification, from *Saccharomyces uvarum* cells, 175

phytase
 production by *Aspergillus niger*, 319
 production by solid-state and submerged fermentations, 319
 influence of agitation on its production, 319
 influence of medium viscosity on its production, 319

plasmid
 integration in yeast, by the influence of palindromic insertion, 169
 transfer between different *Streptomyces* species, 49
 transfer from *E. coli* to *Streptomyces rimosus*, 49

polyketides
 biosynthetic pathway engineering, 203
 oxytetracycline, 203

polyols
 determination in diet chocolate by HPLC, 129
 as prebiotic substrates, 227

polysaccharides
 production by *Ganoderma lucidum*, 327
 immunostimulatory effects, 327

prebiotics
 types of prebiotics substrates, 227
 effect on intestinal microflora composition, 227
 mechanism of its activity, 227

probiotics
 selection criteria, 227
 mechanism of its activity, 227

process control
 measurement of local stirring energy by SIMD, 59
 control of oxygen partial pressure, 59

prokaryotic signalling, 313

promoter regions
 of *rrn* rRNA operons in *Streptomyces rimosus*, 77

proteinase
 Foster-Nieman equation in study of hydrolysis by, 347

Pseudomonas cepacia
 degradation of formaldehyde and formic acid, 197

Pseudomonas putida
 degradation of formaldehyde and formic acid, 197

Pseudomonas sp.
 isolation of strains capable of assimilating carvacrol, 341

purification
 of β -galactosidase and lactase from *Kluyveromyces lactis*, 135
 of antibodies by precipitation methods and chromatographic methods, 215

Q

quality
 of fermented bifido milk, 109

R

RAPD-PCR (random amplified polymorphic DNA-polymerase chain reaction)
 for wine yeast identification, 19, 83

recombinant gene expression technology
 with respect to bio-processing, 313

recombination
 influence of palindromic sequences on mitotic and meiotic recombination in yeast, 169
 heterologous recombination between biological particles, 183

regenerants
 of *Solanum tuberosum* L. potato, 13

regression analysis, 271

RFLP (restriction fragment length polymorphism)
 for wine yeast identification, 19, 83

rice
 as genetically modified food, 259

RP-HPLC
 determination of organic acids from white wines by, 93

rRNA operon
 in *Streptomyces rimosus*, 77

S

Saccharomyces cerevisiae
 CDC6 gene in, 1
 chromosome segregation in, 1
 cell cycle control, 1
 nocodazole treatment of, 1
 isolated from Slovenian vineyards, 141

Saccharomyces uvarum
 lipid composition of, 175

(S)-cyanohydrins
 formation by stabilized hydroxynitrile lyase, 161

sanitizing methods
 new sanitizing agents, 305
 application of hydrogen peroxide, 305
 for disinfection of fresh fruit and vegetable products, 305

sensory evaluation
 of Cottage cheese, 43
 of ice tea, 101
 of Chardonnay wine, 141

skim milk
 preparation by ultrafiltration, 43
 in Cottage cheese manufacture, 43

- in stretchable cheese, 115
 - sodium salicylate
 - for induction of uPA in glioblastoma cell strain, 5
 - soil
 - bioremediation by biosurfactants, 295
 - contaminated with hydrocarbons and heavy oil, 295
 - Solanum tuberosum* L. potato
 - mixoploidy and chimeric structures in, 13
 - callus culture, 13
 - regenerants, 13
 - somaclonal variation, 13
 - solid-state fermentation
 - analysis of growth kinetic profiles in, 271
 - for production of phytase by *Aspergillus niger*, 319
 - soluble methane monooxygenase
 - expression in methanotrophic-heterotrophic community, 29
 - effect of copper, nitrogen source and iron on its expression, 29
 - somaclonal variation
 - of *Solanum tuberosum* L. potato, 13
 - sonication
 - of the *Kluyveromyces lactis* cells, 135
 - sorbitol
 - determination in diet chocolate by HPLC, 129
 - soybeans
 - as genetically modified food, 259
 - squalene
 - extraction and quantification, from *Saccharomyces uvarum* cells, 175
 - stabilization
 - of hydroxynitrile lyase by flavonoids, 161
 - STAT (signal transducers and activators of transcription)
 - identification in *Streptomyces*, 313
 - eukaryotic Stat proteins, 313
 - Stat3, 313
 - Jak-STAT, 313
 - tyrosine phosphorylation of, 313
 - prokaryotic signalling, 313
 - Stirring intensity measuring device (SIMD)
 - for detection of local mixing intensity, 59
 - storage
 - of fermented bifido milk, 109
 - Streptomyces*
 - plasmid transfer between different *Streptomyces* species, 49
 - plasmid transfer from *E. coli* to *Streptomyces rimosus*, 49
 - rRNA operons, 77
 - identification of anti-Stat3 analogue in, 313
 - antibodies specific for Stat-like proteins, 313
 - prokaryotic signalling, 313
 - Streptomyces rimosus*
 - plasmid transfer from *E. coli* to *Streptomyces rimosus*, 49
 - rrnF* rRNA operon (Acc. No. X62884), 77
 - multiple promoters of rRNA operons, 77
 - manipulation of its oxytetracycline gene cluster, 203
 - construction of four recombinant strains, 203
 - stretchable cheese
 - Ca²⁺ and Cd²⁺ addition, 115
 - cheese making parameters, 115
 - submerged cultivation
 - of *Ganoderma lucidum*, 327
 - for production of phytase by *Aspergillus niger*, 319
 - surface cultures
 - of mixed microbial culture, 183
 - synbiotic
 - role of lactic acid bacteria and bifidobacteria in its effect, 227
 - role of prebiotics in its effect, 227
- T**
- taxonomy
 - of *Aspergillus* sp., 333
 - TNF-*alfa*
 - induction by polysaccharides from *Ganoderma lucidum*, 327
 - tomatoes
 - as genetically modified food, 295
 - transgenic food
 - transcriptional regulation, 265
 - translational regulation, 265
 - Trichosporon penicillatum*
 - degradation of formaldehyde and formic acid, 197
- U**
- urokinase
 - in glioblastoma cell strain, 5
 - urokinase-type plasminogen activator (uPA) promoter
 - in glioblastoma cell strain, 5
- V**
- vector design
 - related to bio-processing, 265
 - viscosity
 - influence of, on phytase production by *Aspergillus niger*, 319
- W**
- washing and sanitizing methods
 - for disinfection of fresh fruit and vegetable products, 305

new technologies, 305
application of hydrogen peroxide, 305

wastewater
degradation of formaldehyde by mixed culture of bacteria and yeast, 197
from production of melamine resins, 197

wheat flour
gluten index value, 353
influence on physical dough properties, 353

wine
yeast isolation from, 19, 83
determination of organic acids in, 93, 141
determination of higher alcohols, higher fatty acids and esters in, 141
analysis of aroma components of Chardonnay, 141
sensory evaluation, 141

wine yeast
identification by RAPD-PCR and RFLP analysis, 19, 83
influence on the quality of wine aromas, 141

X

Xanthophyllomyces dendrorhous (formerly *Phaffia rhodozyma*)
effect of light on carotenoid profiles production, 123
astaxanthin production, 123
3-hydroxy-3',4'-didehydro- β - ψ -caroten-4-one production, 123

Y

yeasts
isolated from wine, 19, 83
chromosome segregation in, 1
identification by RAPD-PCR and RFLP analysis, 19, 83
influence on the quality of wine aromas, 141
influence of palindromic insertion on plasmid integration, 169
lipid composition of *Saccharomyces uvarum*, 175
